

With respect to the table employee and department created, Create a stored procedure named as CountEmployee that returns the count of total number of employee in employee Table.

```
1  -- Create Procedure to count Employees
2
3  Delimiter #
4
5  create procedure CountEmployee()
6  begin
7
8  declare count_of_emp int;
9
10 select count(*) into count_of_emp from employee;
11
12 select count_of_emp;
13
14 end #
15
16 Delimiter ;
17
18 -- Call Procedure
19
20 call CountEmployee();
```
