

Table name: employee

Column name or Field name	Datatype
emp_id(pk)	int
name	varchar(50)
dept	varchar(50)
salary	float

Table name: AuditLog

Column name or Field Name	Datatype
employee_id	int
Action	varchar(50)

Create a trigger that logs any insertions into the Employees table into the AuditLog table.

Expected output

employee_id	Action
1	Employee Created
2	Employee Created
3	Employee Created

```
1  -- Create trigger to insert
2
3  Delimiter \\
4
5  Create trigger Insert_AuditLog
6  after insert into employee
7  for each row
8
9  begin
10
11  insert into auditLog (employee_id, Action) values (new.employee_id, 'Employee Created');
12
13  end \\
14
15
16  Delimiter ;
17
18  -- inserting in employees
19
20  INSERT INTO employee (emp_id, name, dept, salary) VALUES (1, 'John Doe', 'Engineering', 60000);
21  INSERT INTO employee (emp_id, name, dept, salary) VALUES (2, 'Jane Smith', 'Marketing', 55000);
22  INSERT INTO employee (emp_id, name, dept, salary) VALUES (3, 'Alice Johnson', 'HR', 50000);
```
