

Table name: employee

Column name or Field name	Datatype
emp_id(pk)	int
name	varchar(50)
dept	varchar(50)
salary	float

Table name: AuditLog

Column name or Field Name	Datatype
employee_id	int
Action	varchar(50)

Write the SQL statement to create a trigger that logs deletions of an employee from the Employee table into the AuditLog table.

### Expected output

employee_id	Action
1	Employee Deleted
2	Employee Deleted
3	Employee Deleted

```
1  -- Creating Trigger For deletion
2
3  Delimiter \\
4
5  Create trigger for Deletion_of_Record
6  After delete on Employee
7  for each row
8
9  begin
10
11     insert into auditLog (employee_id, Action) values (old.employee_id, 'Employee Deleted');
12
13  end \\
14
15
16  Delimiter ;
17
18  -- Deletion of record
19
20  DELETE FROM employee WHERE emp_id = 1;
21  DELETE FROM employee WHERE emp_id = 2;
22  DELETE FROM employee WHERE emp_id = 3;
```
