

**Table name: employee**

Column name or Field name	Datatype
emp_id(pk)	int
name	varchar(50)
dept	varchar(50)
salary	float

**Table name: EmployeeCount**

Column name or Field Name	Datatype
emp_count	int

Create a trigger that automatically updates a EmployeeCount table with the total number of employees each time an employee is added or removed.

Assume there are 10 employee in employee table and 1 employee record is inserted.

**Expected output**

<b>emp_count</b>
11

Now employee is removed or deleted from the employee table

## Expected output

emp_count
10

```
1  -- Create Trigger for insertion of employee
2
3  Delimiter \\
4
5  Create trigger Insertion_of_Employee
6
7  after insert on employee
8  for each row
9
10 begin
11
12     update EmployeeCount set emp_count = emp_count + 1;
13
14 end \\
15
16 Delimiter ;
17
18 -- Create Trigger for deletion of employee
19
20 Delimiter \\
21
22 Create trigger Deletion_of_Employee
23
24 after delete on employee
25 for each row
26
27 begin
28
29     update EmployeeCount set emp_count = emp_count - 1;
30
31 end \\
32
33 Delimiter ;
```
