

Hello, I'm Sushant Kate. I graduated recently from the Mumbai University where I did my diploma with the average 73% of marks. As a recent graduate, I want to start a professional life and contribute to practice what I have learned.

During my studies, I worked on two significant projects that showcase my abilities. The first was a Digital Education Platform which was meant to enhance the interaction between the students and the tutors as well as help with administration of examinations. This platform also contains digital textbooks and video lectures where the major objectives are to decrease students' physical burden and improve the learning process. My second project was developing a Custom ROM for the ASUS Zenfone Max Pro M1, upgrading it to Android 12 after official updates were discontinued.

I am well versed in SQL, HTML, CSS, JavaScript, Python, Visual Studio and MySQL. These skill set has been developed through both class work and assignments or projects.

Outside of my technical interests, I enjoy skygazing and playing games, which helps me stay curious and balanced.

I am looking forward to having the chance to show my professional background as well as my passion in your team and for your projects.
