Semantic Elements	Non-Semantic Elements
They Have Meaning	They Don't have meaning
They describe how the content within them is supposed to behave	They can contain anything
They have specific attribute for their structure	The 'class' attribute can be used to work with their structure

Semantic Elements:-

These **semantic** elements simply mean, elements with meaning.

Example:;

Footer

Form

Table

Nav

Non-Semantic Elements:-

Unlike, semantic elements they don't have any meaning. They don't tell anything about the content they contain.

Example:;

Div

Span
