What is ATS and what is its significance?

A software known as an Applicant Tracking System (ATS) assists organizations in handling job applications by organizing resumes monitoring candidates and simplifying the hiring procedure to enhance efficiency and organization, in recruitment.

Highlight how you will make your resume ATS friendly.

To make resume ATS friendly:

- In resume I'll use standard formatting and include keywords relevant to job description
- Should avoid graphics and fancy fonts and keep resume neet and clean easy to understand
- In resume provide relevant details to the job description and provide clear section heading like skills and work experience
