```
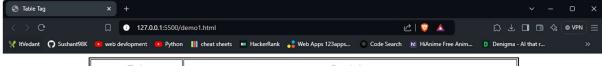

Topic	Description
Program	A set of instructions that you give to a computer so that it will do a particular task
Algorithm	**A step-by-step procedure used to solve a problem is called Algorithm**
Flowchart	*A flowchart is a type of diagram that visually explains a process or workflow*
Compiler	**A compiler translates code written in a high-level programming language into a lower-level language**
Interpreter	An interpreter translates the code line-by-line when the program is running.
Chemical formula of water	H_2O
Area of circle	πr^2
